**COMPANY, ENVIRONMENTAL AND QUALITY POLICY**

**Customers**

The customers are the centre of our Business. We cultivate a very strong partnership, exchanging information and experience, so that we strive to meet customer requirements for “zero errors”, on-time deliveries and quality products

**Markets**

HYDAC products are well established in the world market. Our goal is to continue to strengthen our market position in our sector and to become the market leader with innovative products at competitive prices.

**Business results**

With a sensible degree of investment and a solid profit, a steady, healthy growth should be achieved for the benefit of our customers and staff. Economic efficiency and quality are therefore paramount.

**Staff**

In order to ensure the company’s success, we concentrate great efforts in providing a safe and motivating work environment for our staff. All staff are involved in appropriate training program, professional development and opportunities for new challenges and to provide superior service and support

**Environment**

We use materials and natural resources responsibly, in order to ensure minimal impact on the environment. Our products and the production processes are developed in accordance with this goal and of course in compliance with environmental laws, rules and regulations.

**Quality**

We are continually upgrading our products and services with the help of our Integrated Management System. The processes it contains are constantly being revised to take account of the demands of our customers and regulatory bodies, as well as changes to our internal organization.

Mark G. Keen  
Managing Director
