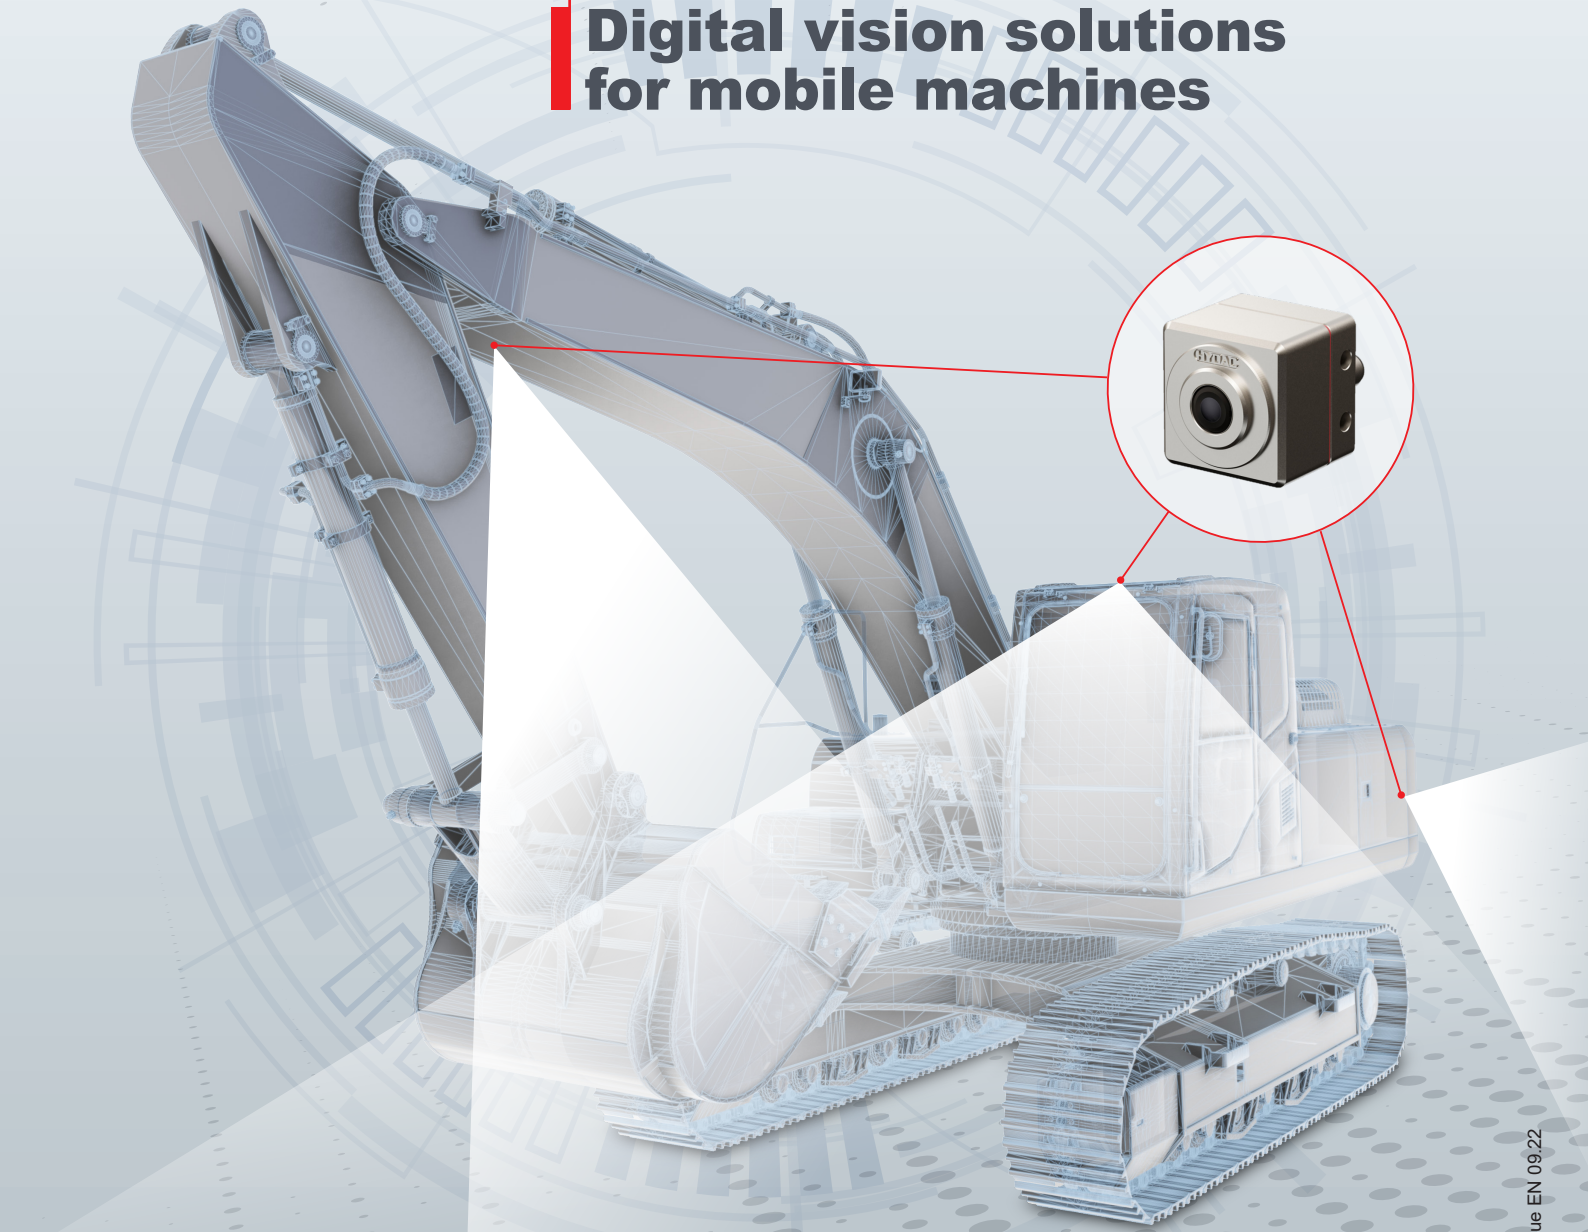
HYDAC INTERNATIONAL

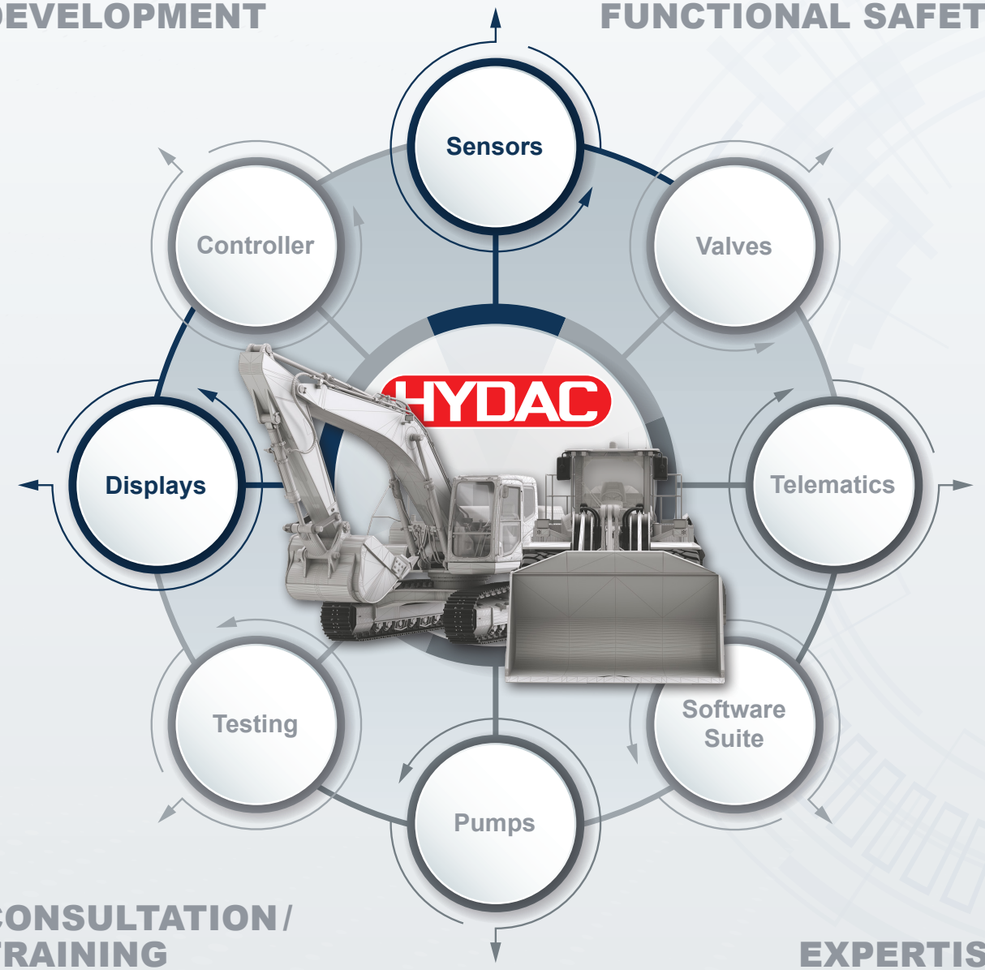
Digital vision solutions for mobile machines



Issue EN 09.22

The fundamental basis of HYDAC

Competence along the entire development chain



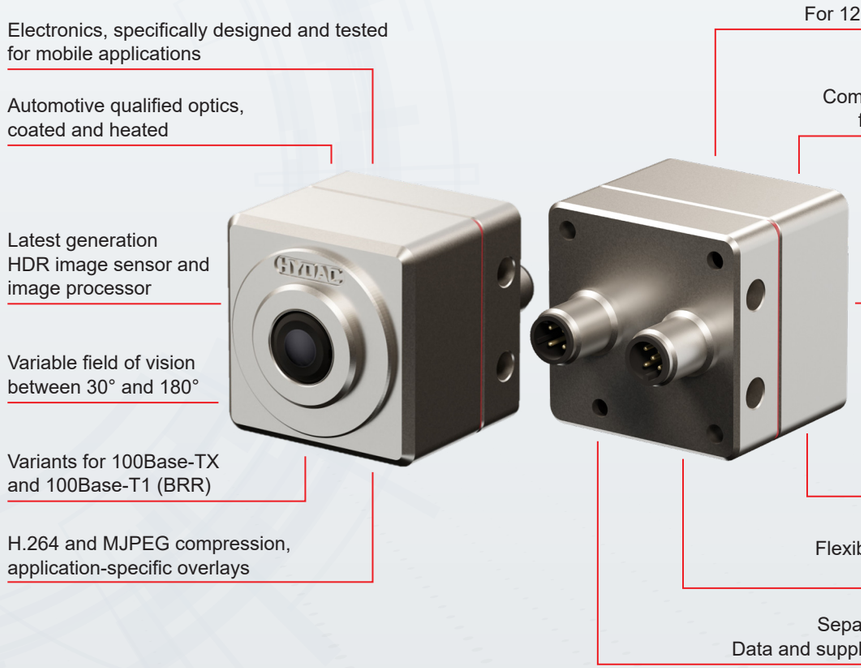
HYDAC Ethernet camera HVT 1000

Components and systems for the off-highway market

Customized solutions for field of view extension are an important part of current and future mobile machines.

Tough requirements apply to the robustness and image quality of the cameras used, as well as to integration and handling. To meet the current and future demands, HYDAC is expanding its existing product portfolio to include digital ethernet cameras of the product series HVT 1000 for the off-highway market.

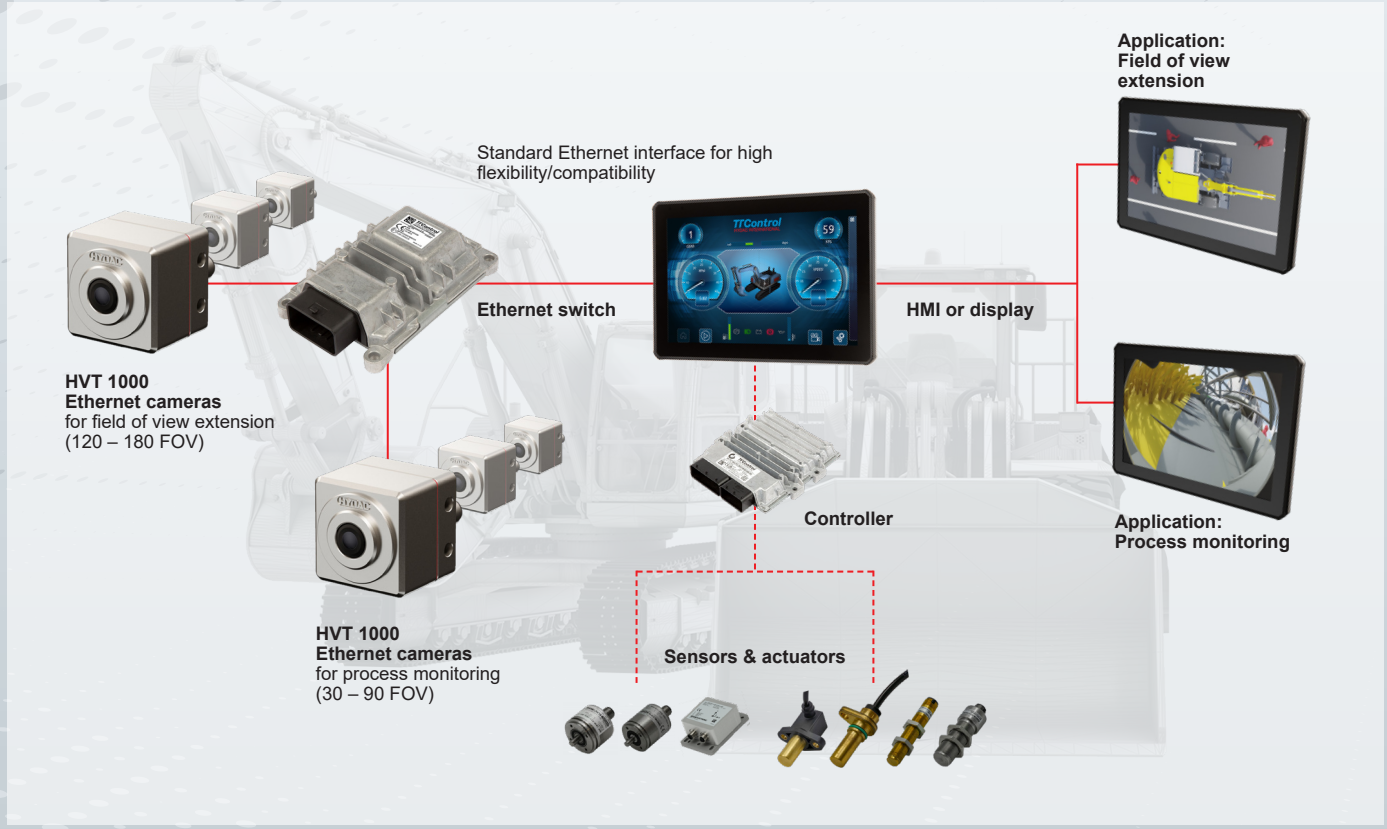
In combination with the existing components and customized software solutions, HYDAC thus offers individual systems for field-of-view extension tailored to the machine.



Systems for digital field of view extension with the HYDAC Ethernet camera HVT 1000

The camera is always a part of a system for field of view extension. The system is completed by switches, displays / HMIs, cables and software applications tailored to the machine.

HYDAC offers all of the necessary components from a single source, allowing for digital vision solutions specifically tailored to the machine.



Enhanced safety with HYDAC assistance systems for your off-highway vehicles.
